

Teeth Whitening F.A.Q's brought to you by...

REMBRANDT[®]

Much More Than A Whitening Toothpaste - <http://www.rembbrandt.com>

Now there is a new way to straighten teeth without braces.

What causes tooth discoloration?

Discoloration may be the result of genetics, medication, poor oral hygiene, aging, smoking, certain foods and beverages, or a combination of these factors.

Are you a good candidate for teeth whitening?

People with most types of discoloration can achieve lighter teeth with Rembrandt One-Hour Smile Whitening. The type of stain you have will affect how much whitening you will experience. Ask your dentist how much whiter your teeth can be.

Is One-Hour whitening safe?

Absolutely! When used under the supervision of your dental professional, the procedure is safe and will not harm teeth or gums. The safety of the Rembrandt program is supported in research studies at leading dental universities.

Will I have to wear a mouth tray?

Rembrandt Lightning Gel does not require the use of a mouth tray. This is a one-visit procedure that your dentist will perform. Rather than having to wear a mouth tray night after night, you will see results immediately.

How do I keep my smile bright?

Clinical studies indicate that daily brushing with Rembrandt Plus™ Toothpaste is all you need to prevent loss of whitening.
